

# mevo

The evolution of mobile kitchens.

---

Why the best kitchens end in a party.  
And not the other way round.

---

---

One day, Marcus Fußstetter had had enough.

For days he is thinking about whom to invite. Sweating, he pushes settees through the rooms, to make room for the DJ. Redecorates the whole apartment. And then?

Everyone ends up in the kitchen again. And he can't even really blame his guests, because he himself is a big kitchen fan. Well, actually he is more like a kitchen fanatic. And let's be honest: they are in fact one of the most beautiful places in the world. Here you can converse at length, snatch the skewered shrimp directly from the pan and eat the chocolate mousse as an appetiser. Due to that – and no decoration idea in this world will ever change anything about this party rule – in the end, the guests end up right there.

So Marcus Fußstetter thought to himself: if the event should take place, where it is planned, the kitchen simply has to come to the guests. And as he also finds that a perfectly considered kitchen not only has to be mobile, but also has to allow maximum creative freedom, he invented mevo.

---

---

The mobile kitchen that you can push to wherever you need it, thanks to heavy duty castors. And behind which you definitely look better than a techno DJ behind his turntables. This is guaranteed by the precise processing, the high-end technology and the noble design that you can find in every little detail at mevo. For example in the incorporated devices from Gaggenau and Bora, the aesthetic lamp from Occhio which can be pivoted by 360° and the luxurious materials which are used in the body, the countertop and the pod.

And it doesn't matter if you like to cook in a log cabin in Alaska and prefer dark, noble woods. Or whether you welcome your guests in a space station and appreciate clean, polished surfaces. Because you can easily take off all the exterior surfaces with one click and replace them with other materials, which can be combined in an infinite number of combinations. mevo is extremely variable and therefore – I can't say it in any other way – also so extremely wonderful.

And in contrast to a techno party mevo is also entirely odourless, thanks to a specialised filter. But this is another story ...

---

ON THE ONE HAND...

MEVO IS JUST A SIMPLE KITCHEN. SURE - A REALLY BEAUTIFUL ONE, WHICH MAKES THE HEART OF EVERY DESIGN ADMIRER FLUTTER WITH ITS CLEAR SHAPES, NOBLE MATERIALS AND HIGH-END TECHNOLOGY. IT IS A LIFETIME INVESTMENT FOR ITS OWNER, TURNS EVERY MEAL FROM BREAKFAST TO A DINNER PARTY INTO A CELEBRATION AND FORMS THE CENTRE-PIECE OF EVERY APARTMENT. NEVERTHELESS - MEVO IS A KITCHEN.

## ON THE OTHER HAND...

MEVO IS SO MUCH MORE THAN JUST A KITCHEN. BECAUSE MEVO IS MOBILE. AND INCREDIBLY VERSATILE. ITS EXTERIOR SURFACES CAN BE EASILY REPLACED WITH NEW ONES WITH JUST ONE CLICK, AND THE NECESSARY EQUIPMENT CAN BE COMBINED VARIABLY. SO MEVO ALSO

IMPRESSES AS A SHOW KITCHEN, A CATERING ISLAND OR AS AN EXHIBITION STAND. AND IN ADDITION, THANKS TO THE INTEGRATED FILTER, WHICH ELIMINATES ALMOST ALL COOKING SMELLS, MEVO IS ODOURLESS.

NO MATTER WHERE IT IS STANDING.

---

mevo **flexibility**

All exterior surfaces of mevo can be replaced by different materials. For example: leather, stone, wood, Corian, metal, and so on...

Equally diverse are its applications. For example as an eye catcher in the apartment, as a show kitchen on exhibitions, as a catering island, as an outdoor kitchen, etc. etc. etc...

---

mevo **technology**

Its applications are as varied as its possible locations.  
For this reason, mevo gives its owner maximum scope  
as regards technology and yet is uncompromising when  
it comes to quality standards.

---

---

mevo technology

**Bora**

All that you will smell with mevo will be the aroma rising from the plates. Nothing else. This is ensured by the cooktop extractor fan from BORA, which draws off the kitchen fumes directly at the hob.

---

mevo technology

**Occhio**

A feast for the eyes: An Occhio Light with a modular head-body system ensures perfect visibility. Rotatable reflector heads can be swapped at any time via an easy plug-in mechanism and so mevo is bathed in warm, pleasant light. Wherever it goes.

---

Gaggenau's steam ovens are real all-rounders and are just perfect for your mevo. The ovens 200 series, for example, brings state-of-the-art professional technology to the kitchen. Fronts made of glass as well as the compact LCD control module with intuitive menu guidance define the clear visual design of all devices and fit perfectly into the minimalist mevo-look.

---

The Rieber water station 600 impresses not only with its minimalist design, but also with its versatility. Its dimensions fit Gastronorm containers and make the water station a multifunctional workplace. With just one container you can bake in the oven, gently roast on the hob and wash up in the kitchen sink.

---

mevo **storage**

A worktop is for working on. So that this doesn't change, you can hang all the stuff that can quickly clutter your worktop on the outside of the body.

The handmade accessories can be combined as you please. Whether it's a knife block, a hook-on tray or a bookend – with these extras you always have everything to hand and still enough space for cooking.

---

im fußstetter

---

mevo **storage**

Knife block single dark

Knife block double dark

Knife block double light

Knife block individual

---

Tray oak/aluminium with or without hang-on-system

Chopping board oak light/dark

---

mevo **organisation**

by fußstetter

Stereotyped thinking has never been so tolerant.

Thanks to variable organisation systems you can also arrange the inside of your mevo to suit your requirements and you always have all utensils near at hand when needed. No more searching.

---

**Organisation** oak/aluminium

**Storage** glass

**Storage** ceramics

**Organisation and storage** combination with felt

**U-Shell** anodised aluminium

Spice roll

Flexible rack oak/aluminium
